Consolidated report of programmes organized on dissuading students from chewing tobacco products

Every year right in the beginning of the academic session a kind of informal workshop is organized for the students wherein they are informed about the ill effects of chewing tobacco products. In addition to this, we developed a practice of conducting physical search of students and staff members alike to see whether they carry tobacco products to the campus in order to make our campus tobacco-free.

A committee headed by Dr. D. W. Deote first appeals the students as well as the staff members to handover the tobacco products. Not many willingly do it. Then a physical search is conducted and the tobacco products are confiscated from the possessors. Initially, the committee had a tough time. The students and the staff members were reluctant to undergo physical search. They gradually got accustomed to it and the number of tobacco chewers decreased with every passing year.

Besides organizing informal workshops, sometimes we also take out rallies to make the general public aware of the dangers of bad habits like tobacco chewing. **Last year we organized a free Dental Check-up Camp and Counselling against Consumption of tobacco products on 6th February 2019 for the residents of Mohpa and the adjacent area. It received a huge response and as many as 427 citizens took advantage of the camp.**
